

CURRICULUM VITAE

We shall never forget, that our creations exist
in the real world of relationships in such way,
in which they are created - ugly or beautiful,
useful or not, a part of us or a part against us!

In all occasions the communication is a
two-way process. It projects itself upon the
development of our aesthetics, moral and
behavior, and then when we will be gone,
upon these who will come after us!
